

POSITION: SOFTWARE ARCHITECT

LOCATION: UNITED STATES

WHO WE ARE

Acuant is a leading B2B provider of identity verification technology. We are revolutionizing the way consumers transact by allowing businesses to quickly and seamlessly identify who they are doing business on any platform while protecting both parties. Join a global team that works with leaders in all industries to deliver best in class technology.

Acuant's Trusted Identity Platform provides complete identity verification based on your level of risk so you can build your business with valid customers. Powered by AI for the highest speed and accuracy, omnichannel products enable seamless customer experiences to increase conversions in the digital economy. Scalable, secure and compliant (KYC, AML & GDPR), Acuant allows businesses to establish trusted identities from any location in seconds. www.acuant.com

WHAT WE LOOK FOR

If you are a world-class Software Architect, living anywhere in the United States, with a strong work ethic and excellent communication skills, we want to hear from you and explore how you can make our services better and even more successful.

At Acuant, we are building a unique digital identity platform to provide anti-fraud and regulatory compliance solutions to the financial services industry: traditional payments, emerging fintech, and marketplaces.

We are a highly distributed organization with offices in Los Angeles (US), New Hampshire (US), Spokane (US), Palo Alto (US), Tel Aviv (Israel) and Mexico City (Mexico), plus remote-work employees in other states and countries.

WHAT YOU BE RESPONSIBLE FOR

You will be responsible for providing leadership and technical direction, as well as owning the full software development lifecycle - problem definition, design, development, testing, demoing, and supporting production.

- Hold primary accountability for platform features, from prioritization to design to release
- Participate in strategic planning for solutions, services, and product development with Senior Management
- Partner with product management to define problems and identify iterative solutions
- Balance immediate business objectives against long-term architectural vision
- Contribute to an engineering-wide culture of code quality and shared responsibility for testing
- Set vision and direction to inspire and drive continuous improvement of engineering processes

- Maintain a comprehensive knowledge of current trends and developments in the industry
- 50% technical leadership and 50% hands on development

Key Qualifications

- Bachelor of Engineering, Computer Science or equivalent
- 10+ years development experience
- 5+ years of proven experience in designing, building and supporting a real time distributed SaaS platform
- Strong leadership skills, but prefer to focus on deep technical ability
- Self-driven, highly motivated, innovative
- Extensive knowledge of modern software development practices
- Proven ability to ship SaaS applications with high quality
- Experience with rapid development and deployment into the cloud
- Ability to make decisions, own it, and adjust as needed later
- Large scale Infrastructure design
- Generalist with full stack skills
- Strong Java, Scala and/or Golang

Desired

- Cassandra, Graph Databases, SOLR, Kafka a plus

HOW WE VALUE OUR EMPLOYEES

- You will always be heard, decisions are collaborative
- Competitive compensation
- Challenging and rewarding work
- Generous benefits package
- Work with an incredible team of smart and mission-driven people
