---

## **WHO WE ARE**

Acuant is a leading B2B provider of identity verification technology. We are revolutionizing the way consumers transact by allowing businesses to quickly and seamlessly identify who they are doing business on any platform while protecting both parties. Join a global team that works with leaders in all industries to deliver best in class technology.

Acuant's Trusted Identity Platform provides complete identity verification based on your level of risk so you can build your business with valid customers. Powered by AI for the highest speed and accuracy, omnichannel products enable seamless customer experiences to increase conversions in the digital economy. Scalable, secure and compliant (KYC, AML & GDPR), Acuant allows businesses to establish trusted identities from any location in seconds. [www.acuant.com](http://www.acuant.com)

## **WHAT WE LOOK FOR**

We are seeking a Senior Software Engineer who is innovative, resourceful and passionate about cloud products. Acuant is looking for game changers with a passion for software development and solving real world problems; not just someone who can code, but someone who's curious and is always game to try new things.

As a Senior Engineer, not only are you an excellent programmer, you are also someone who sincerely enjoys the art of finding simple, efficient, and sustainable ways of solving problems as you will be responsible for the full cycle of design, development, and deployment of Acuant's products.

- Minimum of 7+ years of development experience in C#, Web API, MSSQL/MySQL and Microsoft .NET technologies.
- Experience with n-tier enterprise software development with Microsoft web technologies.
- Fluency in working with Git, Visual Studio, Agile, SCRUM, TDD methodology.
- Fluency in working with third party APIs and SDKs.
- Experience with deployment on AWS is a plus.
- Experience with CI/CD is a plus.
- Strong troubleshooting and problem-solving skills.
- Excellent verbal and written communication skills.
- Detail-oriented, very responsive, and committed to quality.

## **WHAT YOU BE RESPONSIBLE FOR**

- Design and development of software using C# and Microsoft .NET technologies.
- Develop software for all application tiers: user interface, middle-tier business domain components, and database layer components.
- Write internal documentation and specifications, detailed design etc.

## HOW WE VALUE OUR EMPLOYEES

- You will always be heard, decisions are collaborative
- Competitive compensation
- Challenging and rewarding work
- Generous benefits package
- Work with an incredible team of smart and mission-driven people
