---

## **WHO WE ARE**

Acuant is a leading B2B provider of identity verification technology. We are revolutionizing the way consumers transact by allowing businesses to identify quickly and seamlessly who they are doing business on any platform while protecting both parties. Join a global team that works with leaders in all industries to deliver best in class technology.

Acuant's Trusted Identity Platform provides complete identity verification based on your level of risk so you can build your business with valid customers. Powered by AI for the highest speed and accuracy, omnichannel products enable seamless customer experiences to increase conversions in the digital economy. Scalable, secure, and compliant (KYC, AML & GDPR), Acuant allows businesses to establish trusted identities from any location in seconds. [www.acuant.com](http://www.acuant.com)

## **WHAT WE LOOK FOR**

We are seeking a Senior Mobile Engineer who is innovative, resourceful, and passionate about mobile products. Acuant is looking for game changers with a passion for software development and solving real world problems; not just someone who can code, but someone who is curious and is always game to try new things.

As a Senior Engineer, not only are you an excellent programmer, you are also someone who sincerely enjoys the art of finding simple, efficient, and scalable ways of solving problems as you will be responsible for the full cycle of design, development, and deployment of Acuant's products.

- Strong experience with native mobile application development, ideally on both iOS and Android with SWIFT and Kotlin.
- Strong knowledge of App architecture patterns.
- Strong notions of security best practices and demonstrated experience of applying sound mobile security practices.
- Proficiency in one or more relevant programming language. (e.g. Kotlin/Android, Java, SWIFT, JavaScript).
- Experience with JavaScript language and its nuances, including ES6 syntax.
- Knowledge of functional or object-oriented programming Ability to write well-documented, clean JavaScript code.
- Experience with modern build strategies, continuous integration, unit testing, test driven development, static analysis, and automated integration tests.
- Experience implementing and enhancing the CI/CD pipeline for mobile applications. Experience with Jenkins preferred.
- Demonstrated experience delivering and evolving the architecture and DevOps practices for a team developing native mobile applications in an Agile and Lean development environment.

- Experience with Cloud Development Platforms, Mobile/Web development frameworks, and microservice architecture.
- Strong communication skills and the ability to connect with engineers, managers, PMs, customers.

#### **WHAT YOU BE RESPONSIBLE FOR**

- Research and summarize adjacent mobile technology trends to provide guidance
- Mentor the team on the “how” of better use of existing platform components and performance best practices.
- Highly collaborative, a fast learner and willing to work wherever needed on the team.
- Leads system analysis, design, development, and implementation for our existing mobile native applications.
- Leads continuous integration effort using automated testing for mobile applications.
- Contributes to develop and maintain an inclusive and highly collaborative environment for the team.
- Translates stories into design & code. Develops well-engineered code and test artifacts backed by automated tests.
- Research and employs contemporary software development techniques to ensure quality and improve velocity of the team.
- Elevates code into the development, test, and production environments on schedule. Provides follow up Production support.
- Able to effectively communicate technical issues in a manner all can understand.
- Able to work with Scrum Masters and Product Owners to prioritize work relative to both delivering business value and addressing technical debt.

#### **HOW WE VALUE OUR EMPLOYEES**

- You will always be heard, decisions are collaborative
- Competitive compensation
- Challenging and rewarding work
- Generous benefits package
- Work with an incredible team of smart and mission-driven people
