

# Acuant Health

MedicScan® & More for Complete Patient Identity Verification

## Know Your Patient: In-Person, Digital & Remote Solutions

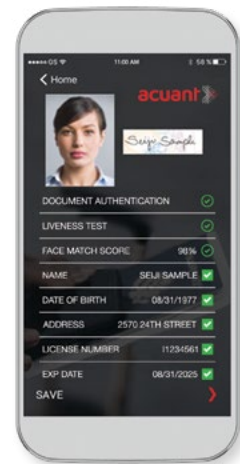

Acuant Health provides a suite of tools and technology needed to secure and streamline patient management in any workflow. We allow you to keep up with the digital transformation occurring, ensure that you meet operational requirements and provide a superior patient experience.

Acuant solves the most critical issues facing patient management and front office:

- **Know Your Patient:** Validate patient IDs and identity in real time for treatment, Rx, billing, remote test services, information/portal access and more
- **Reduce Fraud:** Prevent claims and insurance fraud, identity theft and Rx fraud
- **Improve Operations:** Extract accurate patient data every time from IDs and medical insurance cards, create accurate records, prevent costly errors and reduce claim rejections
- **Upgrade Patient Experiences:** Reduce patient wait time and abandonment, enable low friction workflows for desktop scanners, kiosks, online, mobile apps and cross-device (SMS)

Acuant provides best-in-class data capture and auto-fill for government-issued IDs and medical insurance cards with near perfect data extraction, this means you get accurate data the first time and every time. Our technology is built with data privacy in mind to protect your institution and patient information. We do not store data or images and all transactions are fully encrypted.

## How It Works

Establish Trust, Verify Identity And Provide A Superior Experience - In Seconds

1. Capture front and back of ID and medical insurance cards on scanner, kiosk or mobile

2. Accurate data and images instantly populate your system with the fields you require (EMR/EHR/PMS)

3. Easily add on further security with document authentication and facial recognition match with a liveness test in the same workflow

# AI-Powered Technology for Speed & Accuracy

Prevent Fraud, Patient Mismanagement & Costly Errors

Acuant is trusted by leading healthcare institutions, providers, national retail pharmacies and premiere clinical labs.

## USE CASES

- Contactless Registration & Check-in
- Telehealth & Virtual Health Applications
- Password or KBA Replacement for Patient Portals
- Ongoing Treatment & Online Rx Management
- COVID-19 Testing, Vaccine, Tracking & Immunity Passport
- Visitor & Access Management for Medical Centers
- Identity Verification & Fraud Prevention
- In-Patient & Outpatient Services- Verify the Right Patient

For over 20 years, Acuant has processed millions of trusted transactions daily in 196+ countries in every major industry including Healthcare. Our Trusted Identity Platform provides patented technology to solve real problems such as patient management and access, protecting the most vulnerable, public health safety and properly dispensing controlled substances.

We have a rich history of building identity verification and corroboration technologies with the security and privacy of the individual as a main tenet. Hundreds of hospitals, clinical labs, specialty care centers, pharmacies, medical and dental practices, mental health providers and agencies rely on our software and hardware each and every day. Acuant MedicScan® software automates data and image intake of IDs and medical insurance cards to speed up registration and prevent costly errors for front desk, kiosk, online portal & mobile apps.
