

Acuant ReviewID™

Real Time Identity Document Checks to Catch Fraud & Obtain the Utmost Security

Fast & Secure Manual Review to Pass More Good Customers

Acuant ReviewID™ allows for the utmost assurance by providing expert manual inspection of identity document images in minutes to give you answers and pass more good customers. We understand that businesses want to validate customer identities quickly and securely in order to have trusted transactions. Acuant allows for this in multiple ways with a continuum of identity proofing products.

Acuant ReviewID allows businesses to pass on any IDs that cannot be authenticated in the automated process (Acuant AssureID™) to avoid rejecting documents due to poor image capture, worn, torn or unknown documents. Forensic experts manually review and determine document authenticity in minutes.

Acuant ReviewID is GDPR certified and helps to meet regulations such as KYC and AML, while at the same time not turning away customers or making it a lengthy process. The process is seamless between platforms, allowing users to go between mobile, online and in person devices to transact.

BENEFITS

- ✓ Privacy minded to protect data & PII, GDPR certified
- ✓ Easy API Integration with multi-platform deployment
- ✓ Fast manual review with answers in minutes
- ✓ Forensic document examination experts on hand for escalation needs

Augment Automated Authentication for 100% Adjudication

Acuant ReviewID provides the ability to show certain authentication test failures, highlighting the document area in question to assist the manual review examination and adjudicate for authenticity. We pass that information on to businesses in order to learn why a document was not passed.

You may choose to send any AssureID authentication result for further review, not only questionable ones. This is applicable for very high risk, high security or high net worth transactions.
